 11. Tips & Common Questions
-

1. Welcome

Seek-O-Sphere is a free website that teaches Artificial Intelligence in a clear, friendly way — whether you're eight or eighty. Along the way you'll be helped by **Eulid**, a friendly alien guide. You can read, practise, and watch your progress grow. This manual walks you through every part.

2. Finding Your Way Around

The menu across the top is how you move between sections. Just click a name:

- **Home** — the welcome page.
- **What is AI?, History, Types, Study Tools, Ethics** — the learning chapters.
- **Lab** — practise questions.
- **Find My AI Tool** — get a tool recommendation.
- **Resources** and **Contact** — extra help and how to reach the team.
- **Help** (top-right) — a searchable list of answers.

Tip. You can look around the whole site freely without an account. You only need one when you want your practice to be saved.

3. Creating an Account & Signing In

An account lets the site remember your progress across devices.

1. Click **Sign In** at the top-right.
2. Choose a way to join: enter an **email and password**, or use **Continue with Google**.
3. That's it — you'll be taken to your **Dashboard** automatically.

To leave, open the menu with your name (top-right) and choose **Log Out**. Forgot your password? Use the "Forgot password?" link on the sign-in screen.

Guest browsing. You can explore without signing in, but your practice won't be saved. Create a free account whenever you're ready to keep your progress.

4. Reading the Learn Chapters

Start with **What is AI?** for the basics, then explore **Types**, **Study Tools** and **Using AI Responsibly**. Each chapter uses everyday examples and pictures instead of technical language, so you can read at your own pace. Many cards expand when you click their heading — give them a tap to see more.

5. Exploring the History of AI

The **History** section lets you travel through time from 1950 to today.

- Drag the **year slider** (or use the < > arrows) to move through the years.
- The **focus card** shows what happened that year, and for big moments it compares "Then" and "Now".
- Tap a **landmark chip** to jump straight to a famous milestone.
- Try the **Guess the Year** mini-quiz at the bottom to test yourself.

6. Practising in the Lab

The **Visual Learning Lab** is where you practise. Here's how to start in the **Curriculum Lab**:

1. Open **Lab** from the menu and make sure the **Curriculum Lab** tab is selected.
2. Choose your **curriculum** (CBSE, ICSE, UK, US or IB) and your **age group**.
3. Pick one or more **subjects** — Math, Science, English, History or Geography.
4. Press **New Question**. Eulid gives you a question to solve.
5. Type or tap your answer, then press **Check**.
6. Stuck? Press **Hint** before answering. After answering, read the **Explanation** to learn why.

Your **streak** grows with every correct answer in a row, and — when you're signed in — every question you answer is saved to your Dashboard.

7. Exam Prep

Preparing for a competitive exam? Switch to the **Exam Prep** tab in the Lab.

1. Choose your exam: **CUET, Railways, Bank PO, SSC** or **UPSC**.
2. Pick a **difficulty**, and optionally set a **timer** to practise under pressure.
3. Press **New Question** and answer just like in the Curriculum Lab.

A scoreboard tracks your correct answers, accuracy and streak as you go.

8. Find My AI Tool

Not sure which AI tool to use for a task? Open **Find My AI Tool**, describe what you want to do, and optionally filter by subject or "free only". The site suggests the best-matching tools from its catalogue.

9. Your Dashboard

When you're signed in, your **Dashboard** shows how you're doing:

- **Headline stats:** Overall Accuracy, Best Streak and Active Days.
- **Progress Report:** a chart of how many questions you answered each day — switch between Last 7 Days, Last Month and Lifetime.
- **By subject:** your accuracy in each subject you've practised.
- **Activity & sessions:** a calendar heatmap and a list of recent practice.
- **Profile picture:** click the small camera on your avatar to upload a photo, or the × to remove it.

Just started? A new dashboard shows zeros until you answer a few Lab questions while signed in — then your charts fill in automatically.

10. Help Centre & Contact

Click **Help** (top-right) to open the Help Centre. Pick a topic card to see its questions, or type in the search box to find an answer fast. If you still need help, use the **Contact** page to send a message — great for students, parents and teachers alike.

11. Tips & Common Questions

Question	Answer
Is it really free?	Yes — Seek-O-Sphere is free for learners of all ages.
Do I need an account?	Only if you want your progress saved. Browsing is open to everyone.
My dashboard shows zeros.	Answer a few Lab questions while signed in; progress records from then on.
Can I use it on my phone?	Yes — the site works on phones, tablets and computers.
It looks slow or stuck.	Refresh the page. Your name and progress load from a fast local cache first, then update.
How do I use AI responsibly?	Read the "Using AI Responsibly" chapter — it covers honesty, fact-checking and privacy.
